

Dr. Supran,

I consider it a great privilege to offer this testimonial of how wonderful Dr. Supran has been in helping me rehabilitate a recent problem with my lower back. Fourteen (14) years ago I had to have lower back surgery, and it was only recently that I experienced my first significant back problem since.

During this recent episode, after unsuccessful results resting my back and using anti-inflammatory medication prescribed by my primary physician, I was very uncertain as to my next course of action ... until a business colleague I respect very much gave me a convincing recommendation for Dr. Supran. Because of an unfavorable result I had with another chiropractor 14 years ago (that perhaps ultimately led to my need for the aforementioned surgery) I was a little hesitant to visit a chiropractor again. But when my symptoms continued to be similar to the symptoms I had experienced before my surgery I decided I had nothing to lose and everything to gain by seeing him.

I am so thankful for making the decision to do just that. From the very first moment that I called to make an appointment, to this day three (3) months later, I must say that my experience with Dr. Supran and every one of his excellent, caring staff has truly been one of the most positive experiences with a healthcare professional in my life. Dr. Supran and his staff truly care about the people they're serving!

Finally, I've been extremely impressed with Dr. Supran's systematic and thorough approach in the treatment he's provided. I've also experienced how important it is to have confidence in a doctor's treatment. Healing begins with optimism, confidence and belief, and it's been his work that has helped me develop that confidence. As a result of my visits with him I am extremely grateful to have recovered from my situation ... and, just as importantly, to have learned how to continue to take care of myself to prevent further problems to the best degree possible. If you're having a problem that requires professional attention, and are unsure about the effectiveness of a chiropractor, I truly hope that you'll give Dr. Supran the opportunity to enrich your life the way he has mine. I believe the "Live Strong" wristband he wears well exemplifies the type of person he is, and the help he seeks to be to others!
